

RCMB Field overview for safe flight activities.

1. Red line indicates edge of the grass runway closest to the pilots' stations; it is located 25 feet in front of them.
2. Yellow line indicates the AMA required safety line. All flying will occur east of the yellow safety line other than take offs and landing between it and the red line indicating the edge of the grass runway.
3. All low high speed flybys must be announced and performed over the grass on the East side of the paved runway if another pilot is flying.
4. Take off and landings must be announced to the other pilots flying. Dead stick aircraft have priority over all other aircraft.
5. Prior to entering the flight area to hand launch or retrieve an aircraft you must announce "Man on the field"
 - A. Once the plane is launched return to a pilot's station and announce "Field Clear"
 - B Retrieve the plane when it is safe to do so and clear the field by announcing "Field Clear"
6. No flying South of the three red barrels not shown on this picture, but are visible at the field.
7. No flying below 100 feet directly towards the pilots' stations, parking area or buildings.
8. Planes flying below 100 feet will fly in a racetrack pattern designated by the runway direction arrow.
